Notes (1)

Alexei Lisyuk is a general hygiene doctor and has been the head of the medical unit of the IK-3 penal colony since at least August 2023. In that position, Lisyuk was responsible for the health of Alexei Navalny from 25 December 2023 until his death on 16 February 2024. Lisyuk neglected the dire detention and health conditions of Navalny, failed to ensure that his unit had adequate resuscitation capacities and failed to order his transport to the nearest hospital on time after he collapsed on 16 February 2024. The IK-3 penal colony is known for exerting physical and psychological pressure, full isolation, torture and violence on prisoners as well as for the poor quality of medical services. Lisyuk is therefore responsible for serious human rights violations in Russia, including torture and other cruel, inhuman or degrading treatment or punishment.
